Notes to Appendix No. 16 :

1. To the rates given in tables No. 7 and 8, depending on the location of the land plots, coefficients are applied: around Tashkent within a radius of 20 km - 1.30, the capital of the Republic of Karakalpakstan and regional centers within a radius of 15 km - 1.20 , district centers within a radius of 10 km - 1.15 and other cities within a radius of 5 km - 1.10.  
The distance to land plots is determined from the administrative boundaries of cities and district centers along highways. In cases where a land plot is located near two cities, a coefficient corresponding to the higher functional purpose of the city is taken.
2. When calculating the land tax levied on dekhkan farms, the following coefficients are applied to the rates given in Table No. 8, depending on the quality of the land: with soil quality up to 40 points - 0.75, from 41 to 70 points - 1.0 and over 70 points - 1.25.  
The application of the coefficients specified in paragraphs 1 and 2 is carried out on the basis of information from the bodies that carry out state registration of the right to land plots, provided to the relevant bodies of the state tax service.
3. In forestry for pasture land not used for grazing livestock, the tax is paid at the rates for other land.
4. For land occupied by mines and quarries located within the administrative boundaries of cities and towns, the tax is paid using a coefficient of 0.1 to the rates given in tables Nos. 5 and 6 for the respective zones.
5. For land plots provided to individuals for entrepreneurial activities, the tax is levied at the rates approved for legal entities.
6. For land plots occupied by collective and individual garages, tax is levied from individuals at the rates approved for lands of individual housing construction.
7. When calculating the land tax levied on individuals, the base rates given in tables Nos. 5 and 6 are applied to land plots within the established standards, and for land plots in excess of the established standards, a multiplying coefficient of 1.5 is applied to the base rates .  
For the purpose of calculating land tax on individuals, the following norms for land plots are applied:  
Tashkent city, Nukus city and cities of regional subordination - 0.06 hectares;  
other settlements (with the exception of dehkan farms) - 0.1 hectares.
8. Land tax from legal entities and individuals on non-residential premises in multi-storey residential buildings is calculated based on the area of non-residential premises divided by the number of floors.
9. For land plots occupied by construction in progress, land tax from legal entities is paid at double rates, unless otherwise provided by law.
