## Reporting Requirements

### CONSTITUTION

The Marshall Islands Budget is governed by the requirements set out in the Constitution of the Republic of the Marshall Islands as well as the Financial Management Act 1990. Article VIII of the Constitution outlines the founding principles for the management of finances in the Marshall Islands. In terms of the annual appropriation bill the Constitution states that:

- I. The Minister of Finance shall, in relation to each financial year, lay before the Nitijela, as soon as practicable after the commencement of its regular session, budget estimates of the revenues and expenditure of the Republic of the Marshall Islands for that financial year.
- II. The budget estimates shall cover all expected sources of revenue payable into the General Fund, including loans raised or to be raised, and all proposed expenditure from the General Fund including expenditure charged on the General Fund by this Constitution or by any Act, or payable under a continuing appropriation.
- III. Budget estimates relating to the raising of loans shall be accompanied by an analysis showing the future cost of servicing and repaying the loan.
- IV. Budget estimates of capital expenditure shall be accompanied by an analysis showing the estimated future cost of maintaining the asset created or acquired.
- V. The program areas categorized in the budget estimates for that financial year (other than items charged on the General Fund by this Constitution or by Act or payable under continuing appropriation) shall be included in a single Bill, to be known as the Appropriation Bill, which shall be introduced into the Nitijela to provide for the issue from the General Fund of the sums necessary to meet the expenditure incurred in those program areas and the appropriation of those sums for the purposes specified in the Bill.

### FINANCIAL MANAGEMENT ACT

The Financial Management Act (Financial Management Act) through Section 120 outlines that a comprehensive system for national financial management should be in place which includes procedures for the:

- Orderly establishment, continuing review and periodic revision of national financial objectives, programs, and policies;
- Establishment of policies and procedures that conform with government accounting and auditing procedures;
- Development, coordination and review of long-range programs and financial plans that will implement established national objectives and policies;
- Preparation, coordination, analysis and enactment of a budget that is organized to focus on national programs and their costs, and that authorizes the implementation of the longrange plans in the succeeding budget period;
- Evaluation or alternatives to existing objectives, policies, plans and procedures that offer potential for more efficient and effective use of national resources; and

- regular appraisal and reporting of program performance

**Section 1221** establishes the governing principles around the budget:

- The budget shall be balanced;
- Planning, programming, budgeting, evaluation, and appraisal
- Reporting shall be by program areas or groups of program areas;
- The formulation and operation of the budget will serve as an implementation mechanism for the plan;
- The national program structure shall be such that it will enable meaningful decisions to be made by the Cabinet and the Nitijela at all levels of the structure. At its lowest level, it shall display those programs which are the simplest units of activities, about which resource allocation decisions are to be made by the Cabinet and the Nitijela;
- A program which serves two or more objectives shall be placed in the program structure along with that objective which it primarily serves, and where desirable, it shall also be placed with other objectives, but its cost is not to be included with the total cost of that objective or program area because it is included in some other objective or program area;
- The full cost, including research and development, capital and operating costs, shall be identified for all program areas regardless of the means of financing. Costs shall be displayed in the year of their anticipated expenditure, regardless of whether such costs have been authorized to be expended by prior appropriation acts or are authorized to be expended by existing law or require new appropriations or authorizations;
- Objectives shall be stated for every level of national program structure;
- The effectiveness of program areas in attaining objectives shall be assessed;
- Planning shall have a long-range view; and
- Systematic analysis in terms of problems, objectives, alternatives, costs, effectiveness, benefits, risks and uncertainties shall constitute the core of program planning.

**Section 126** of the FMA outlines specific requirements of the budget, which include: a requirement: (i) for a national program structure; (ii) for a statement of national objectives; to outline the financial requirements to carry out the recommended programs; a summary of receipts and revenues in the last completed fiscal year; (iv) for a revised estimate for the fiscal year in progress, and an estimate for the next fiscal year. Section 126 requires that information contained in the budget shall be presented generally in the following manner:

- Information shall be displayed by program areas:
- program area financial requirements shall appropriately crosswalk between the program areas and expending agencies;
- Data shall be appropriately summarized at each level of the program structure;

- A summary showing means of financing the total recommended expenditures, those amounts requiring and those amounts not requiring legislative appropriation or authorization for spending for the fiscal year;

- iii. The total estimated revenues with and without the proposed changes.

Finally, the FMA allows for the proposed budget to include such other financial statements, information and data which in the opinion of the Cabinet are necessary or desirable in order to make known in all practical detail the programs, program plans, and financial conditions of the Republic.

## National Strategic Plan 2020-2030

His Excellency, President David Kabua launched the National Strategic Plan (NSP) 2020–2030 in June 2020. The NSP is defined around five sectoral pillars which comprise 24 strategic areas in total. Each strategic area includes its own over-arching goal and related policy objectives.

Currently ongoing work is being completed to cost the NSP by Policy Objective. The following table outlines the five sectoral pillars and their corresponding strategic areas and policy objectives.

## **Emergency Responses**

### **3.1 Overview of COVID-19 Response**

The RMI has a well-established and comprehensive emergency readiness system which has been activated for the COVID-19 global pandemic. In the event of a disaster, the Chief Secretary activates the National Disaster Committee (NDC), which operates at the Emergency Operations Center (EOC). This system (NDEOC) coordinates with other national agencies who play a role in responding to the declared disaster.

Coordination of national agencies and partners is managed in part through a cluster system, coordinated by the NDMO on behalf of the CSO. Inter-cluster coordination is managed via the NDC and the NDMO. RMI operates a number of clusters, depending on the nature of the emergency.

His Excellency President David Kabua declared a State of Health Emergency for COVID19 on 7 February 2020, preparedness and response efforts are coordinated through the National Disaster Committee (NDC). The activation of the National Emergency Operation Center (NEOC) has initiated the RMI's Cluster system with activities focusing on health sector improvements, COVID19 economic impact, vulnerability assessments, and developing plans that focus on preparing the remote neighboring islands and atolls for COVID19.

The government approved the RMI Corona Virus (COVID-19) Pandemic Preparedness and Response Plan on 25 of March 2020. The purpose of the plan is to strengthen the preparedness in RMI to rapidly detect and respond to the potential introduction of COVID-19. The plan focuses on seven key components of the Framework of Action in the WHO Novel Corona virus Technical Guidance: (i) command and coordination; (ii) surveillance, risk assessment and response; (iii) laboratory; (iv) clinical case management and infection prevention and control; (v) public health intervention including points of entry measures; (vi) risk communication; and (vii) logistics, procurement, and supply management.

#### **3.1.2 COVID-19 Response and the 2021/22 Budget**

The RMI has received a total of \$57,466,897 to use towards COVID-19 relieve efforts. The largest donor was the Asian Development Bank providing over \$18 million in funding

support. As of August 21, 2021 over \$42 million has been expended or is encumbered with \$14 million remaining. The table below provides an overview of the funds received and expenditure activity to date.

## **Economic Outlook**

Strict travel restrictions and quarantine requirements since the onset of the coronavirus disease (COVID-19) pandemic have helped detect all four positive COVID-19 cases at the border but have also damaged economic activity. The prolonged border closure contributed to successive economic contractions. Following a decline of 5.5% in fiscal year (FY) 2020, the economy is projected to contract by a further 1.4% in FY2021, while exports and trans-shipment related to fisheries, and construction activity remain subdued.

The government has taken comprehensive fiscal measures to mitigate the economic impact of the Covid-19 pandemic. The size of the Covid-19 response plan was recently increased to 63 million USD (26.3 percent of GDP) for FY 20-21, from an initial envelope of 42 million USD (17.5 percent of GDP), with a view to strengthen health preparedness and support vulnerable groups. Development partners have so far provided grant financing 50 million USD (21 percent of GDP). Implementation of the package to date has reached 21 million USD (25 percent of GDP).

## **Revenue**

### **5.1 Total Revenues**

Total revenue in the budget is categorized into four areas: The General Fund, Compact Revenue, Special Revenue, and other revenues, which are mostly overseas development assistance (ODA) provided by RMI's development partners.

The budget saw a decrease from \$271,288,610 in FY21 to \$242,974,025 in FY22. This is mainly attributed to a decrease in General Fund Revenues and ODA. General Fund revenue decreased from \$90,718,722 (estimated) in FY21 to \$72,004,000. The overall decrease per revenue source is detailed in Table 3 below.

Table 3: FY2021 and FY2022 Revenue Variances

## 8. Annex Economic Policy Statement Overview

The Economic Policy Statement is currently being prepared for review and consideration. The EPS will be presented during the Appropriation Committee Hearings. The EPS is designed to improve public financial management

### **Background**

In June 2021 the RMI approved updated Fiscal Responsibility and Debt Management Act. The objective of the fiscal responsibility and debt management legislation is to ensure more effective governance and alignment of budgeting with the National Strategic Plan (NSP). The outcome will be improved public financial management. The legislation provides for the annual presentation of an Economic Policy Statement to Nitijela by the Minister of Finance. The primary elements of said statement include:

- I. an assessment of the extent to which the economic and fiscal update prepared under the Act is consistent with the short-term intentions referred in the Act; and
- II. if the economic and fiscal update departs from those short-term intentions, an explanation of the reasons for the departure.

Additionally, the Act states that the economic policy statement shall also include:

- (a) scenarios that:
  - (i) contain projections of trends in the variables set out in the Government's medium-term objectives and where prescribed, long-term objectives, for fiscal policy, which projections shall illustrate, for stated assumptions, likely future progress towards achieving the medium-term objectives and long-term objectives);
  - (ii) explain the reasons for any differences from previous scenarios;
- (b) an assessment of the consistency of the scenarios with the medium-term objectives, and where prescribed, long-term objectives; and
- (c) if the scenarios depart from the medium-term objectives or long-term objectives, an explanation of the reasons for the departure.

**The Economic Policy Statement provides clear strategic directions for economic and development progress.**

The is Economic Policy Statement provides direction for the Government to pursue economic policy objectives in accordance with the principles of responsible fiscal management as presented in the Fiscal Responsibility and Debt Management Act (2020) including:

- Reducing total debt to levels that will provide a buffer against factors that may impact adversely on the level of total debt in the future
- Maintaining debt levels by ensuring that, on average, total operating expenses do not exceed total operating revenues;

- Achieving and maintaining levels of total net worth that provide a buffer against factors that may impact adversely on total net worth in the future
- Managing the fiscal risks facing the Government
